

**We Need Your Help To Promote  
And Build Knowledge About  
Therapeutic Post Adoption Services**

**Background Info:**

- For 10 years, the Center for Adoption Support and Education (CASE) has provided therapeutic adoption services, including clinical, family and group counseling. and educational services for adoptive families.
- Currently, these services are not widely available to families that need this kind of support. CASE hopes to change this by providing the adoption field with information on families who currently receive therapeutic adoption services versus those who do not.

**Adoption Study:**

- To achieve this goal, CASE has partnered with Social Dynamics. a social research and survey organization founded by Dr. Douglas Klayman.
- Social Dynamics is in the process of conducting a survey of families that have *never* received *therapeutic* adoption services and have at least one adopted child between 5 and 18 years of age.

**Role of Families:**

- Families who choose to participate in the survey will complete a short online survey. Each family is eligible to complete the survey three times.
- Families who participate in the survey will receive a \$10 gift certificate
- All information collected on the survey is strictly confidential!

**For more information contact Dr. Doug Klayman,**  
President of Social Dynamics:
